## REMARKS

The Japanese documents listed herein were cited in connection with examination of corresponding Japanese Patent Application No. 11-138543; a copy of the Official Action from the Japanese Patent Office identifying these references also is submitted herewith for the Examiner's consideration.

English translations of the Japanese Patent documents are not readily available to Applicants' attorney, but may be provided if required by the Examiner. In this regard, U.S. Patent No. 5,502,580 corresponds to the JP '623 reference; U.S. Patent No. 6,320,980 corresponds to the JP '300 reference, and U.S. Patent No. 5,982,416 corresponds to the JP '265 reference. An English abstract for each of the Japanese references obtained from a commerical data base also is enclosed as an English language statement of relevance for the Examiner's consideration.

Further, in the Japanese Official Action, the Japanese Examiner generally makes the following assertions:

The JP '623 reference discloses a system in which a converting table is formed from the input target profile and the output target profile so as to convert any input image, and that it is well known, e.g., from the JP '623 reference, that plural profiles have been prepared to be selectable;

The JP '300 reference discloses the use of a grey chart;

The JP '300 and JP '603 references each disclose a system in which a table prepared for each of the color components;

The JP '966 reference discloses that a highlight portion is edge-emphasized in a color correction of an image;

The JP '603 reference discloses that color correction is performed after white balance has been corrected;

It is well known, e.g., from the JP '265 and JP '273 references that color correction can be adjusted according to the input device; and

JP '244 reference discloses that the kind of input device is included as a code in the header information of an image.

Without conceding the propriety of the Japanese Examiner's characterizations of the references, Applicants submit that none of these references discloses or suggests the features of the present invention; particularly, Applicants submit that none of these references discloses or suggests at least the features of the cited holding step, generating step, and characterizing portions (see Claim 1).

FEE STATEMENT

A check in the amount of \$180.00 to cover the fee under 37 CFR § 1.17(p) is enclosed. The Commissioner is authorized to charge any deficiency in or overpayment of fees to Deposit Account No. 06-1205.

CONCLUSION

It is respectfully requested that the above information be considered by the Examiner and that a copy of the enclosed Form PTO-1449 be returned indicating that such information has been considered.

Applicants' undersigned attorney may be reached in our Washington D.C. office by telephone at (202) 530-1010. All correspondence should continue to be directed to our address given below.

Respectfully submitted,
